

DEPARTMENT OF MATHEMATICS,Activities 2015

About Department

The department of mathematics was established in 1975. The subject is offered both in science and humanities.

Mathematics Played a significant role in the development of physical and social sciences. Mathematics is one of the most fascinating sciences. It is universal and important as all other sciences use and need mathematical knowledge. In fact there exists no branch of science and engineering in which some mathematical procedure is not found essential. That is why Bacon had rightly remarked "Mathematics is gate way and key to all the sciences".
