

Community Outreach Activities 2019-20

Nukkad Natak on cleanliness and personal hygiene

September 2, 2019

The staff and students of Community Outreach Cell went to Government Primary School Sanjauli on September 02, 2019. Keeping in mind the deteriorating state of cleanliness in our city, a Nukkar Natak was organised by the students of the college to sensitize the children about cleanliness and personal hygiene. Programmes of this nature develop awareness amongst students regarding the need for a clean environment and this will in turn help the students of the school to inspire other individuals whom they meet in their day-to-day life. Pictorial charts were shown to the children for better understanding. It was an interesting session where the children enjoyed interacting and learning from the students of the college. At the end of the programme refreshments were provided to the students. The staff members of the cell who accompanied the students were Dr. Gitanjali Mahendra, Ms Preeti Kaundal, Ms. Poonam Thakur.
