## GREEN ECONOMY AND TRADE

World trade patterns show that while many developing countries are now playing an increasing role in trade, many others – particularly least developed countries who account for less than one per cent of all global trade – remain stranded on the margins. Still heavily reliant on natural resource based products and raw materials for their exports, these countries are highly vulnerable to economic and environmental shocks.

the manifold environmental challenges lying ahead.

Trade can also power a green economic recovery from COVID-19. Global demand for environmental goods and services is expected to rise as countries roll out economic stimuli with larger earmarks for climate-friendly solutions.

It is thus crucial for the trading partners to have a balance between the trade and economy so that it won't have a devastating effect on our planet.

The transition to an inclusive green economy represents many significant opportunities. By harnessing the increasing global demand for environmental goods and services, as well as consumer demand for more sustainable products, countries can

## THE WORLD OF VACCINE

Three years into the incessant outbreak of Novel Corona Virus, we are still highly preoccupied about the disease and its consequences. Corona virus (COVID-19), which is an infectious disease caused by the SARS-CoV-2 virus originated in Wuhan, China in December 2019 and soared quickly across China and spread worldwide as of 23rd May 2020. New rules of isolation, distancing and sanitization were announced and as a part of a war against COVID-19 Vaccines were introduced to reduce risk and save lives.

### WHAT IS A VACCINE?

A vaccine is a biological preparation that provides active immunity to a particular infectious disease. It contains an agent that resembles a disease-causing micro-organism and is often made from weakened or killed forms of the microbe, its toxins, or one of its proteins. The agent stimulates the body's immune system to recognize the agent as a threat, to destroy any of the microorganisms associated with that agent that it may encounter in the future. The administration of vaccines is called vaccination.

The first ever vaccine was developed by Edward Jenner, for smallpox in 1796. After that several scientists worked to develop vaccines like DTP Vaccine, Measles, Mumps and Rubella (MMR) vaccines. When polio vaccines were licensed in 1955, Jonas Salk, its inventor, became an overnight hero. The COVID-19 vaccine is intended to provide acquired immunity against severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), the virus that is responsible to cause COVID-19. A single dose of the COVID-19 vaccine made by either Pfizer or AstraZeneca cuts a person's risk of transmitting the SARS-CoV-2 to their closest contacts by as much as half, according to an analysis of more than 365,000 households in the United Kingdom. Although the vaccines have been shown to reduce COVID-19 symptoms and serious illness, their ability to prevent corona virus transmission has been unclear.

COVID-19 IS DEADLY DANGEROUS COVID-19 VACCINE BY BIOLOGICAL SCIENTISTS DEVELOPED IN COLLABORATION WITH THE INDIAN COUNCIL OF MEDICAL RESEARCH (ICMR) NATIONAL INSTITUTE OF VIROLOGY (NIV)

There are three main approaches to making a vaccine:

1. Use of weakened or killed microorganisms
2. Use of the microorganism's toxins
3. Use of genetic material

There are three main approaches to designing a vaccine. Their differences lie in whether they use a whole virus or bacterium, just the parts of the germ that triggers the immune system, or just the genetic material that provides the instructions for making specific proteins and not the whole virus. Inactivated vaccines do not replicate and are therefore unlikely to reverse and cause pathological effects. They contain dead virus, incapable of infecting people but still able to instruct the immune system to mount a defensive (fighting) against an infection.

## BUDGING ENTREPRENEURS FROM DEPARTMENT OF COMMERCE & MANAGEMENT

Before the concept of entrepreneurship is explored, it is important to, first, understand the meaning of 'entrepreneur' & also know who can be an entrepreneur. An entrepreneur is someone who exercises initiative by organizing a venture to take benefit of an opportunity and, as the decision maker, decides what, how, and how much of a good or service will be produced. An entrepreneur supplies risk capital as a risk taker, and monitors and controls the business activities. The entrepreneur is usually a sole proprietor, a partner, or the one who owns the majority of shares in an incorporated venture. If one desires to be an entrepreneur, the given equation is what describes, what an entrepreneur actually is

Entrepreneur + Capital = Products + Customers = Business.

**सृजनात्मकता : संसार की गतिशीलता के लिए जल्द**

सृजन सृष्टि का आदि एवं कारक तत्त्व है, जो काल की गतिशीलता को बनाए रखता है। सृजनात्मकता के कारण ही संसार के सभी कार्य - कलाप निरंतर चलते रहते हैं। ईश्वर ने अनादिकाल से पर्वत, नदी, वृक्ष, फूल, जीव-जंतुओं आदि का सृजन कर जीवन की धारा को आगे बढ़ाया। नारी जब शिशु को जन्म देती है तो समूचा घर किलकारियों से गुंज उठता है। यह सृजन का उत्तम स्वरूप होता है। हमारे मनीषियों ने वेद-वेदों का सृजन किया तो ज्ञान के अक्षुण्ण प्रकाश से अज्ञानता का अन्धकार धीरे-धीरे छूटता चला गया। अनंत काल से जीवन के हर क्षेत्र में सृजन होता आ रहा है। साहित्य के क्षेत्र में भी देखें तो अपनी सृजन - शक्ति एवं कलम के माध्यम से

गया। सत्र 2021-22 के बीच हिंदी विभाग द्वारा आयोजित सभी गतिविधियों में जिन छात्रों ने भाग लिया, उनकी प्रस्तुति इस वार्षिक पत्र में आपके समक्ष है। साथ ही गतिविधियों का संक्षिप्त वर्णन, प्रोटो सहित प्रस्तुत किया गया है। आशा है कि सभी पाठक पत्र को पढ़ते हुए इनसे अवगत भी होंगे एवं छात्रों के सृजनात्मक कौशल और प्रयासों को सराहेंगे। धन्यवाद!
