SEMINAR ON "PATTERNS IN NATURE AND DISCOVERIES IN SCIENCE"

The Physics department hosted a one-day seminar entitled "Patterns in Nature and Discoveries in Science" on September 13, 2019 to mark the 150th Anniversary of the Periodic Table of Chemical Elements and celebrate the International Year of the Periodic Table in 2019. The seminar aimed to promote awareness of the history, development, and significance of the periodic table in the field of science.

Objectives:

To motivate the participants interest to pursue further study and research in the field of chemistry and related sciences and to introduce them to a comprehensive understanding of the history of periodic table, the recent advancements, future potential in the study of the periodic table, the correlation of the periodic table and properties of the natural world resources, use of periodic table in medicine, technology and industry, affecting our daily lives, The basic motive was to inculcate in the students and researchers to further the study in the wide field of period table and related topics

During the seminar, a movie based on the development of the periodic table, "Mystery of Matter: Unruly Elements," was shown to students. This was followed by an open, on-the-spot quiz on the elements of matter, allowing participants to test their knowledge and engage with the content.

Additionally, Professor P.K. Ahluwalia, a retired professor from Himachal Pradesh University, delivered a talk on the topic "From Elements to Materials: An Edifice on the Foundation of Periodic Table." The talk explored the connection between the periodic table and the development of materials, emphasizing the importance of the periodic table in scientific research and development.

The participants were engaged through immersion in the field of discoveries in science through a quiz and also learnt from the insights from Professor Ahluwalia about the impact on scientific research and development by tracing the history and significance of periodic table.

Outcomes:

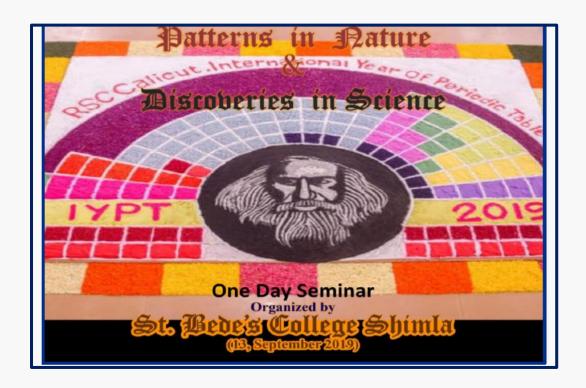

The seminar highlighted the importance of the periodic table in science education and the possibility of the use of the periodic table in various applications in chemistry, physics and engineering, revelations in the classification of periodicity of atomic radius, electronegativity, ionization energy of different elements and the grouping of their position in the periodic table.

The seminar laid emphasis on the periodic table as a fundamental tool for understanding the behavior of matter, an area which was explored by scientists such as Dmitri Mendeleev and Henry Moseley.
