ACTIVITIES 2023-24

Emerging Trends in Computational Mathematics

Date: August 31, 2023

Objective: To empower students with the ability to interpret a given dataset and derive a representative value that effectively summarizes the set of data points. Additionally, guide them in acquiring the skills to implement the provided dataset in Microsoft Excel for comprehensive analysis.

Description: Department of Computers Science and Mathematics organized an interdepartmental activity on "Emerging Trends in Computational Mathematics" for the students of B.Sc. and BCA. In the activity B.Sc. students presented the concept of Statistics while its implementation on M.S. Excel was presented by BCA students.

Outcome: Students understood the concept of data analysis and learnt its implementation on MS Excel

Emerging Trends in Computational Mathematics (August 31,2023)

GUEST LECTURE

Date: November 8, 2023

Objective: To provide students with clear understanding of the fundamental concepts of Probability and Statistics and the importance of these concepts in various aspects of Computer Science and Engineering.

Description: Department of Mathematics and Computer Science organised a guest lecture on the topic “Probability and Statistics in Computer Science and Engineering” on November 8, 2023 for the students of Maths and Computer Science in the seminar room. Dr. Pawan Sharma, Associate Professor, Department of Mathematics and Scientific Computing, NIT, Hamirpur was the resource person. The resource person discussed about significance of probability and statistics in the fields of computer science and engineering.

Outcomes: Students acquired a more profound comprehension of foundational concepts in probability and statistics in their relevance to computer science and engineering. Additionally, students became cognizant of the practical applications of probability and statistics in decision-making, data analysis, and diverse engineering projects.

Quiz

Date: November 30, 2023

Objective: To assess the students' knowledge of transportation and game theory and also to develop their critical thinking skills.

The online quiz on Transportation and Game theory was held for 3rd year Sec students in the classroom on November 30, 2023. The students participated individually in the Quiz.

Outcomes: The quiz yielded positive outcomes, providing an opportunity for students to evaluate their knowledge and understanding of the subject matter. It played a crucial role in nurturing critical thinking and problem solving abilities that are valuable in various academic and real-world contexts.

National Mathematics Day

Date: December 22, 2023

Objective: To promote Mathematical awareness among students, to develop critical, logical and problem solving skills and to encourage them to engage towards discoveries in the field of Mathematics.

Department of Mathematics
St. Bede's College, Shimla

Description: The Mathematics Department of St. Bede's College organized a presentation on Vedic mathematics, a quiz, and a Video Making Competition (centered around the works of Ramanujan) on December 22, 2023, to celebrate Ramanujan's birth anniversary. The quiz champions were Payal Mehta, Himani, and Pooja, while the runner-up position was secured by Sunidhi Sharma, Roopanshi, and Tanya.

Outcomes: It helped the students to develop and enhance their critical thinking skills, which are valuable not only in Mathematics but in various aspects of life. It also encouraged students to approach problems in novel ways, fostering a spirit of creativity and innovation among them. It also created the awareness of the discoveries in the field of mathematics.

National Mathematics Day (December 22, 2023)

National Science Day

Date: February 28, 2024

Objectives: To spread the message of importance of science and its applications in daily life and to engage the youth in research activities. Also to encourage healthy competition and teamwork among the participants

Description: On 28, February, 2024, Science Stream of St. Bede's college celebrated National science day. The theme for the event was "Indigenous Technologies for Viksit Bharat". The resource person for the session was Dr. Ramesh Chand Thakur, Director IQAC and Associate Professor, Deptt of Chemistry, HPU, Shimla.

Dr. Ramesh Chand Thakur informed students about the importance of science in daily life. He discussed recent indigenous scientific and technological achievements. He laid emphasis on the

Department of Mathematics
St. Bede's College, Shimla

value of home-made technologies. He also discussed the career options available for science graduates.

After interactive session Intra-college Quiz competition was held. The competition comprised of three rounds. Participants were challenged with a diverse set of questions covering various aspects of modern science. Science departments also participated in science model exhibition

Outcomes: The session was an extremely enlightening and informative experience for students. It inculcated critical thinking and scientific attitude. Students came to know about various career options available for them. They gained a lot of knowledge about the modern day science. The event increased students' knowledge of scientific inquiry and promoted positive attitude towards science. It broadens the technological literacy both individually and collectively.

International Day of Mathematics

Date: March 14, 2024

Objective: The purpose of this activity is to promote the importance of mathematics in various fields, and to encourage interest in mathematics among students.

Description: International Day of Mathematics also known as 'Pi day' was celebrated today, in computer lab 2 of St. Bede's College through power point presentation on mathematics in science. Students of B.Sc. non-medical participated in the event.

Outcome: This activity increased the awareness of mathematics among the students in various disciplines, such as science, engineering, finance, technology. It also develops a positive perception of mathematics among the students.
